Keeping Up with Current Trends Is Essential

Current trends indicate an increasing demand for jobs using high-end materials and specialized inlay installations. The **DL7000** is here to help installers meet this demand while saving time and money. *"The saw paid for itself after the first job!"* quotes **DL7000** user, Sid Sidman, Fantastic Floors Inc.

Designed for the shop setting, this 3/4hp wet band saw makes precision cuts through natural stone, porcelain, glass and ceramic tile. It can even handle slab materials up to 1 ½" thick.

"We use to cut circles on a regular table saw, taking up to ½ hour to cut. Now using the DL7000, we cut them in 10 minutes; saving time and money," states DL7000 customer Raul Rodriguez of Whistler Tile Marble.

Its durable metal construction stands up to the heaviest shop use. Easy-to-use adjustments allow installers to cut quickly and its large two-wheel design creates a 13" throat depth for deep diagonal cuts. The DL7000 includes instructional manual, toll free tech support and 1 year warranty.
