Stone Series Equates To Rustic Elegance

TAMPA, FL. (April 11, 2007) – Diamond Tech Tiles brings a touch of the outdoors in with a new natural stone mosaics and accent line. Diamond Tech's Stone Series is hewed from natural stone, bringing luxurious warmth and beauty to any setting. Its durability and value are certain to set the standard of "affordable luxury," the hallmark of all Diamond Tech Tile products.

"Because it is a quarried stone, it has a natural earthy quality with random shading and subtle veining," said Rita LeVine, Marketing Director, Diamond Tech Tiles. "Natural stone holds up extremely well over time, taking on a distinctive old world charm."

Natural stone tile has been a flooring material as long as there have been finished floors. Our marble and granite is cut very precisely into shaped tiles of various sizes that can be installed as just like any manufactured tile. Diamond Tech Tiles offers three distinctive finishes: polished, honed and tumbled. The honed and tumbled stone possess a distressed and textured finish that can be very attractive as well as slip resistant.

Diamond Tech's decorative offering of basket weaves, octagon and dots, hexagons, 5/8" mosaics and 5" x 6" tiles, chair rails and pencils lend a rustic elegance to any floor, wall or backsplash allowing for greater design creativity for all who use it. Whether in the living area, entryway or bathroom, the Stone Series Mosaics and Accents versatility makes any room a landscape for a unique creation.
