Color has a Voice in Vista Glass Tiles

TAMPA, FL. (November 5, 2009) – Color has a voice in Vista, a newly released glass tile series from Diamond Tech Tiles (DTT). Vista, meaning view, reflects colors found in some of the most beautiful landscapes from around the world.

"I am very impressed with this new line of glass tile. The colors are magical!" states Rita LeVine Marketing Director for DTT.

The use of these colorful tiles in entryways, kitchens and baths will create ambient color reflective of their namesakes. Vista Harbor Mist washes over a room with the serenity of a quiet morning fog. Fountain Blue creates a living space with the subtle color of a serene bubbling fountain. Vista Gecko whispers a soft delicate green, reminiscent of the tiny animal for which it is named . Each of the eight iridescent colors in the series allows for a unique mood set by organic colors.

However, color is not all this glass tile has to offer. Vista's tactile qualities elicit a desire in one to reach out and touch the tile's surface. This 'soft rippling' pattern is a perfect compliment to other building materials such as ceramic, porcelain and stone.

Available in showrooms late fall, the Vista Series is sold in a 3/4" x 3/4", 3/4" x 1 5/8"; 1 5/8" x 1 5/8", oval and round mosaic formats with complimentary pencil accents. The Vista Series creates dramatic indoor and outdoor wall applications. Visit www.DTTiles.com to take a closer look at this amazing tile.
