## **The Impact Factor**

TAMPA, FL. (June 23, 2010) – This stunning new tile series is a unique fusion of translucent and diffused glass with natural stone and metal tiles. The distinctive look of Impact strikes forcefully onto today's design scene.

Quarried from the depths of the earth comes the most fantastic marble: Ming Green, White

Statuary, Black Marble, Emperador Dark and Crema Marfil. Each playfully combined with reflective glass and metal to transform them into an extraordinary tile combination we call the Impact Series.

This new series is offered in a 5/8" mosaic, 5/8" x 1 7/8" stacked and a staggered weave in seven color waves; each create an organic and contemporary ambiance.

Impact Tile Series-new from Diamond Tech Tiles will complement some of the hottest design trends today! Visit [www.DTTiles.com](http://www.DTTiles.com) to take a closer look at this amazing tile.
