Sophisticated Stone

TAMPA, FL. (January 3, 2011) – Every room needs a strong focal point; why not add it with drama and dimension? Contour Series from Diamond Tech Tiles is the perfect tile to do just that.

The Contour Series is a split-faced stone mosaic tile, which needs no grouting and provides a sophisticated textural look. Seven distinctive facial reliefs ranging from a rough-hewn, polished marble and a combination, bring a softer side to modern.

Each surface texture is available in four popular stone colors: Emperado, Crema Marfil, White Statuary and Light Emperado. Contour's 12" x 12" panels provide a flawless, groutless application for a smooth clean installation.

For tile with a feel of antiquity and a look of contemporary aesthetics - Contours decorative stone tiles. Visit www.DTTiles.com to take a closer look at this amazing tile.

About Diamond Tech Tiles

Diamond Tech Tile is a subsidiary of The Daniels Corporation, a customer-friendly American based company. Founded over 25 years ago, the Daniels Corporation's primary objective is to promote the use of art glass and mosaics by providing innovative products. Our products are used in both exterior and interior design applications, including kitchen backsplashes, bathrooms, fireplace surrounds and feature walls. Our products are also ideal for pools, fountains and spas. We offer several lines of tiles, each with a distinctive look and feel to maximize design possibilities.
