BRILLIANT THINKING...

creative design!

TAMPA, FL. (December 20, 2011) –
Stunning sophisticated and
exceptional design defines the new
Opus Series. Artfully created by our
own in-house designers, we bring you

the finest in marble, glass and metal tiles.

Available in 4 graphic patterns, these large scale mosaics take their inspiration from the Bauhaus style of design. Hand assembled of water-jet cut mosaics, Opus is offered in a palette of deliciously colored marble brushed stainless steel and reflective glass. The scale of the Opus series mosaics is most at home in residential or commercial vertical applications.

Opus is one of three tiles in the new Style Collection from Diamond Tech Tiles. This debut collection delivers a high-style jolt to the world of tile. Visit www.DTTiles.com to take a closer look at this amazing tile.
